<input type="checkbox"/>	<b>Application of Soil Performance Standard Guidance</b>	RR-676	<b>10/08/2001</b>	RR676.pdf
	This guidance answers the question: What is the level of soil contamination that is required to be addressed, and hence, could be addressed through the use of a soil performance standard at closure?			
<input type="checkbox"/>	<b>Commonly Asked Questions about Lead (Pb) Soil Standards in Wisconsin</b>	RR-653	<b>04/19/2001</b>	RR653.pdf
	This guidance provides answers to the common questions that DNR staff and consultants have raised about the lead (Pb) direct-contact residual contaminant levels in Table 2 of NR 720, Wis. Adm. Code. Examples are given to show general NR 720 precepts on determining direct-contact site-specific RCLs when Pb is present at a site.			
<input type="checkbox"/>	<b>Determining Residual Contaminant Levels Using The EPA Soil Screening Level Web Site</b>	RR-682	<b>01/10/2002</b>	RR682.pdf
	This guidance describes how to use the EPA web site on soil screening levels to determine generic residual contaminant levels that are in accordance with NR 720, Wis. Adm. Code (large .pdf file)			
<input type="checkbox"/>	<b>Guidance for Cover Systems as Soil Performance Standard Remedies</b>	RR-709	<b>04/15/2004</b>	RR709.pdf
	Comprehensive guidance for remedy selection, design, construction and operations of soil performance standard cover system remedies.			
<input type="checkbox"/>	<b>Guidance for Design, Installation and Operation of Soil Venting Systems</b>	RR-185	<b>11/19/2003</b>	RR185.pdf
	Technical guidance for soil venting systems (AKA soil vapor extraction systems) intended for consultants and DNR staff. As described in the Errata, SW509 replaces Attachment 1 (not included in the on-line version.)			
<input type="checkbox"/>	<b>Guidance on Soil Performance Standards</b>	RR-528	<b>04/15/2004</b>	RR528.pdf
	Soil performance standards offer an alternative to numerical soil standards for closing out contaminated soil sites. They may not be used as an alternative to meeting groundwater standards. Revised and Updated to account for rule changes and Publication RR-709.			
<input type="checkbox"/>	<b>Guidance on the Use of Leaching Tests for Unsaturated Contaminated Soils to Determine Groundwater Contamination Potential (New Addendum - 10/7/03)</b>	RR-523	<b>10/07/2003</b>	RR523.pdf
	For use in assessing the potential for contaminated soil to contaminate groundwater in excess of ch. NR 140 standards; not intended for leaching tests to determine waste characteristics or leachability of wastes that have been stabilized. Addendum: Adds examples to illustrate how SPLP data should be interpreted and analyzed to determine SSRCL protective of groundwater. The empirical basis, use of statistics and their limitations are included in this Addendum.			
<input type="checkbox"/>	<b>Naturally Occurring Biodegradation as a Remedial Action Option for Soil Contamination Interim Guidance (Disclaimers Updated Sep. 2004)</b>	RR-515	<b>09/15/2004</b>	RR515.pdf
	Technical guidance for evaluating petroleum contamination sites for their suitability for remediation through natural biodegradation intended for use by consultants and DNR staff at contamination sites.			
<input type="checkbox"/>	<b>Smear Zone Contamination</b>	RR-712	<b>12/10/2003</b>	RR712.pdf
	This fact sheet provides guidance on how the smear zone is evaluated to help determine whether a site is placed on the GIS Registry for soils exceeding generic or site-specific RCL's.			
<input type="checkbox"/>	<b>Soil Cleanup Levels for Polycyclic Aromatic Hydrocarbons (PAHs) Interim Guidance</b>	RR-519	<b>04/01/1997</b>	RR519.pdf
	Provides suggested generic soil cleanup levels for PAHs based on protection of groundwater quality and protection of human health from direct contact with contaminated soil via ingestion or inhalation.
